Career Objective

Experienced Software Engineer with more than 2 years of expertise in developing software solutions. Proficient in backend and frontend development, cloud infrastructure, and modern frameworks. Strong focus on clean, efficient code, system architecture, and cross-functional collaboration. Seeking to leverage technical skills and problem-solving abilities in a challenging role. Committed to continuous learning and innovation in cutting-edge technologies.

Technical Skills

Languages : HTML, CSS, JavaScript, ReactJs, NodeJs, ExpressJs, MySQL, JQuery, AWS, Go.

Other Libraries : react-query, gsap, scss, bootstrap, material design, tailwindcss, redux.

Technical Skills : system design, rest-api, websockets, third-party integration, object-oriented programming, cross-platform responsive design, manual testing.

Soft Skills : communication, team work, problem solving.

Experience

SpacePe India Services LLP

May 2024 – Present

Software Engineer

full-time

Website techrajendra.com

- Developed a fully responsive and scalable website using a headless architecture by integrating the WordPress REST API for dynamic content management.
- Implemented GSAP animations to enhance user engagement and create a smooth, interactive browsing experience.
- Collaborated with an SEO specialist to optimize website structure, metadata, and content for improved search engine visibility.
- Ensured seamless navigation and responsiveness across devices for an enhanced user experience.

Customer Relationship Management System

- Designed and developed the complete frontend of a Customer Relationship Management (CRM) system with a user-friendly UI.
- Implemented dynamic forms for lead creation, task management, and complaint tracking, streamlining customer interactions.
- Developed the accounts section to display customer details along with their bank statements for financial tracking.
- Built a rule-based access control (RBA) feature, allowing executives to filter customers, leads, tasks, and complaints using customizable rule combinations.
- Integrated an Excel export functionality, enabling filtered data to be downloaded for reporting and analysis.
- Collaborated with multiple frontend developers, merged and optimized React code for a seamless pre-deployment process.

Banking as a Service (BaaS) Software

- Developed and integrated the user authentication module, implementing secure JWT-based login and session management to ensure safe and seamless access.
- Designed a user profile management system, enabling users to update personal details, manage security settings, and configure account preferences while ensuring data protection and compliance with security standards.

Legal Buddy India Private Limited

Jan 2024 – Apr 2024

Full Stack Engineer

freelance

- Designed and developed the entire platform, handling both frontend and backend development using NextJs.
- Built a custom CMS dashboard, allowing lawyers to create, edit, and manage legal clauses, resolutions, acts, and rules.
- Implemented an admin panel for managing user subscriptions, monitoring payments, and controlling access levels.
- Integrated Razorpay payment gateway for a pay-per-clause and resolution-based subscription model, enabling users to access content based on their subscription.

- Developed a dynamic access control system, ensuring users can view only the number of clauses and resolutions allowed in their plan.
- Deployed the website and dashboard on AWS, configuring Nginx as a reverse proxy for optimized performance and security.
- Optimized backend services, including user authentication, data management, and API integrations.

Aartas Care Private Limited

Oct 2022 – Dec 2023

Software Developer Associate

full-time

- Developed a medical dashboard for care coordinators to monitor doctor in/out timings and manage patient vitals efficiently.
- Implemented a monthly timing management system to track doctors' working hours, enabling accurate billing for their services.
- Built a pharmacy management system, allowing executives to bill patients, manage inventory, and track purchases, returns, sales, and dumps.
- Integrated daily sales reports for the pharmacy, providing real-time insights into transactions and revenue.
- Designed an appointment management system with full CRUD operations, allowing care coordinators to schedule, update, and cancel patient appointments.
- Enabled care coordinators to bill patients for their appointments and manage patient check-outs efficiently.
- Implemented location-based access control, ensuring that users can only access system features relevant to their assigned branch or facility.
- Designed and developed an open group chat system and APIs in Golang to handle chat functionality and data processing.
- Enabled pharmacy executives to make bulk purchase entries using vendor-provided Excel sheets, streamlining inventory management.

Addon ShareWare Private Limited

Sep 2022 – Oct 2022

FrontEnd Developer

Internship

- Developed responsive websites, ensuring cross-device compatibility and a seamless user experience.
- Implemented interactive contact forms with validation and user-friendly UI to enhance customer engagement.
- Integrated websites into the .NET framework, ensuring smooth backend communication and data handling.
- Gained hands-on experience in frontend and backend development, improving coding efficiency and problem-solving skills.

Projects

Portfolio

2025

A self growth and experience showcasing project

- Developed a modern interactive portfolio showcasing projects, skills, and experience using NextJs, and GSAP for animations.
- Check this out on [portfolio](#).

Education

Indira Gandhi National Open University

2021 – 2024

Bachelor in Computer Application

correspondence

CSI Polytechnic College

2016 – 2019

Diploma in Electronics and Communication Engineering

full-time
